Commercial Blueprint Boot Camp is a basic blue print reading class designed for the men and women of commercial construction who work with blueprints. Learn about the basics of architectural blueprints from language, terminology, scale reading, and material take off to reviewing the organization of plans and specifications.

The 12-hour course will cover all aspects of a project beginning with sitework, foundations, structural, building envelope, interior finishes, mechanical, electrical, and plumbing. The student will learn how to distinguish between plans, elevations, sections, and details; learn about schedules and legends, identify symbols and read specs. The course will be taught by Allen Roberts, who has had over 40 years of blueprint reading experience.
